

Alaska

Traversing the Inside Passage

Tuesday, June 22,
to Friday, July 2, 2010

Alaska's rugged Inside Passage is known for its unrivaled assortment of wildlife, its gold rush history and its magnificent natural beauty. A region of mountains, glaciers and the Tongass National Forest, it is the largest contiguous temperate rain forest in the world.

Hike and explore this remarkable area and travel the scenic Alaska Marine Highway to destinations such as Ketchikan, Juneau, Sitka and the remarkable Glacier Bay National Park. Participants must be comfortable traveling with a large backpack as their luggage for the duration of the trip.

The fee of \$2,330 includes all air, land and water transportation, park admissions, camp fees, lodging fees, camping equipment and some meals. Tuition for two credits is extra. The class meets on Wednesday, June 2, 2010, from 6 to 8 p.m.
