

Facility Management Certificates

About the Program

The Facility Management program provides students with a broad exposure to the business area with specialty training in the functions of facility management. The program provides students with entry-level job skills used by facilities managers. It also helps those currently employed in the field update their knowledge or learn new skills.

All of the courses required for the two certificates will also count toward the Associate in Applied Science (A.A.S.) degree in Facility Management.

Program web site: www.cod.edu/FacMgmt

Facility Management General Certificate

Total Required Credits: 15

Code: 4228

The Facility Management General certificate provides a basic understanding of the field of Facility Management. The certificate is aimed at people already working in the field or those who are considering it as a career choice.
