

# SLPA Program Sequences

## Two-Year Recommended Sequence and Optional Three-Year Sequence

The following program sequences assume that general education requirements have been completed. Additionally, these sequences do not take into account the potential need for elective credits. Students may apply to and be accepted in the SLPA program prior to completion of general education requirements; in such cases, their course sequences must be adjusted accordingly and the program may require additional time to complete. Students are not allowed to enroll in Clinical Methods and Documentation (SLPA 2101) and Clinical Practicum (SLPA 2112) until all general education classes have been completed. It is expected that students are prepared to graduate upon completion of all SLPA program courses.
