Construction at a glance

The school year may be coming to an end, but construction around campus certainly is not. Here is a list and diagram of various projects that are going on and will continue through the summer months. As is often the case, construction plans may change, so continue to read the Courier and visit the Public Information and Facilities Master Plan pages at www.cod.edu.

Early Childhood Education Center:

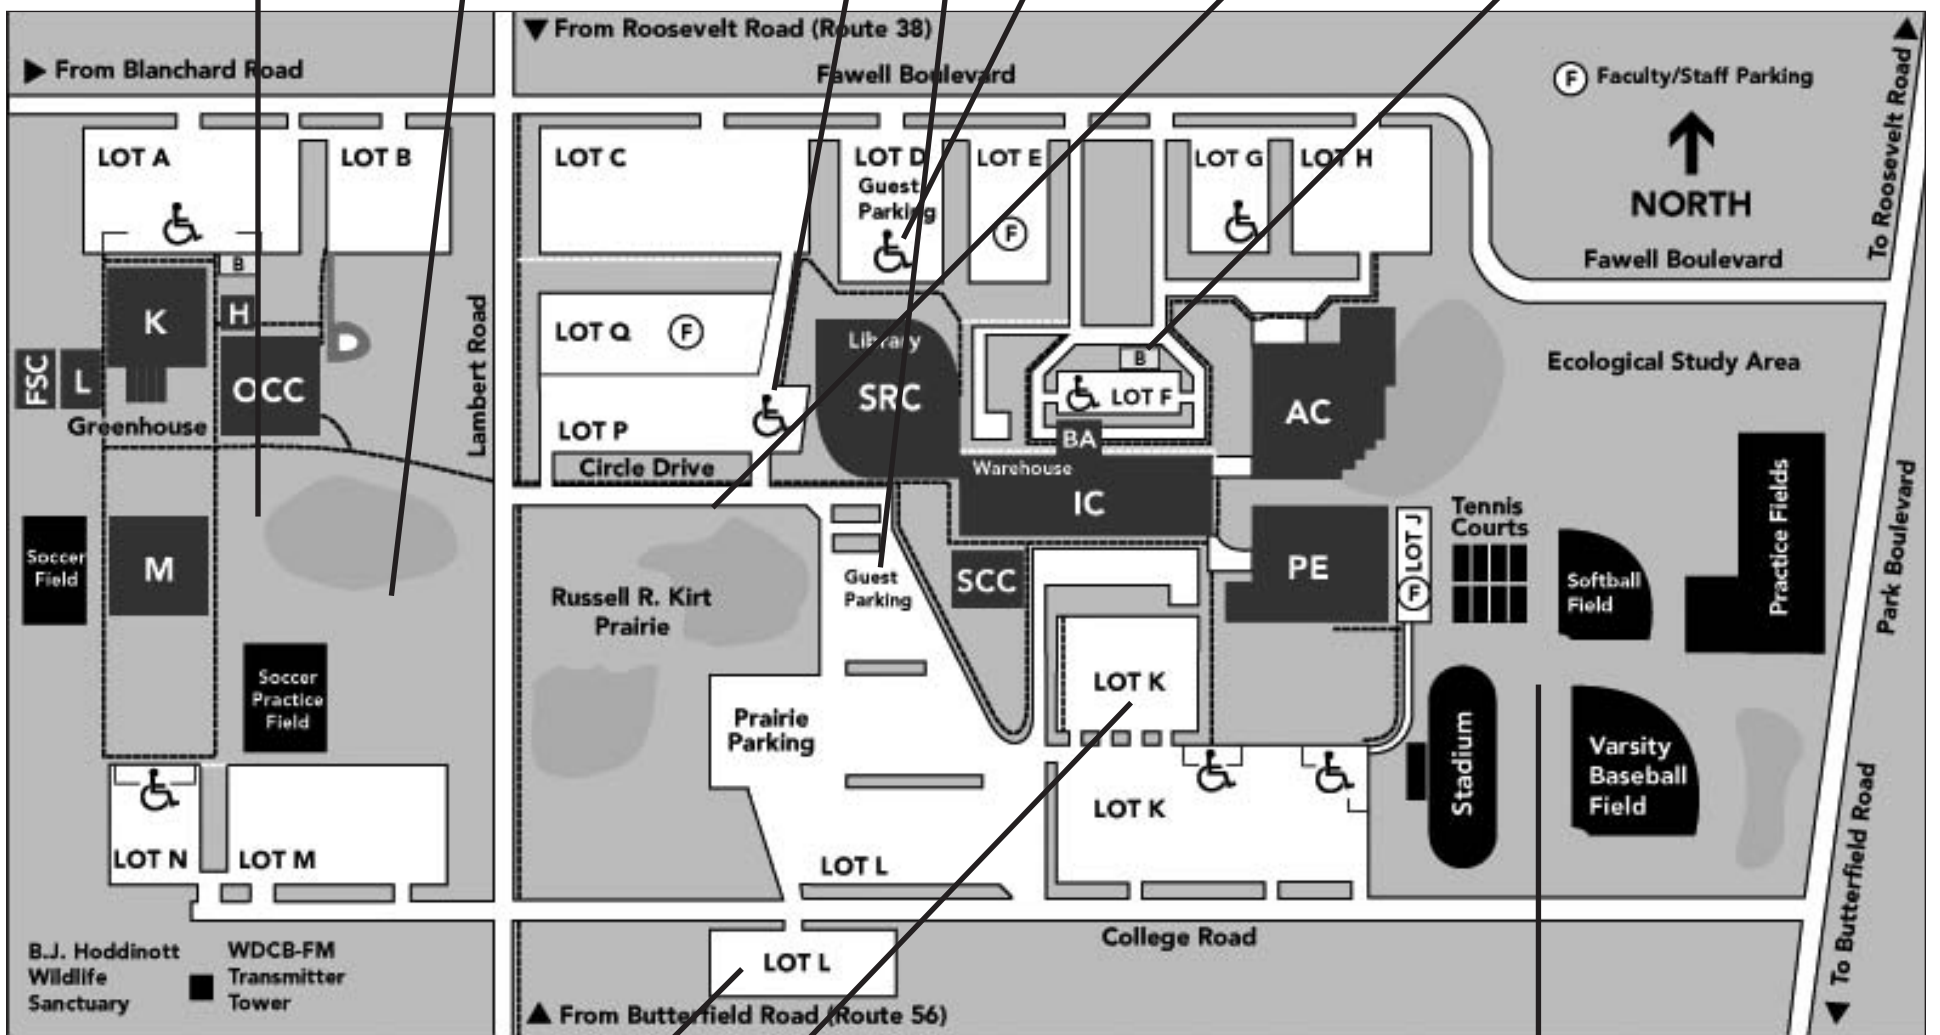

Excavating for footings and foundations has begun, and utility work around the soccer field will start in May. Barricades will be in place though pedestrian traffic should not be affected. Upon returning to school in the fall, the frame of the building should be up.

Handicapped parking:

From May 1 to August 15, handicap spots temporarily will be moved from lots D and P to Lot Q and the guest parking area.

PACE bus route:

Starting May 1 the location of the PACE bus stop temporarily will be moved from its current location to the southwest side of the SRC, close to the prairie, to make way for construction plans.

New parking lots update:

Lot K is completed, and a final walk through is being scheduled. Lot K should be available for parking at the end of April. Bioswells within lot K are not finished, but the lot will open regardless. Bioswells are rectangular areas enclosed by cement curbs within the parking lot that contain water pipes, trees, grass and storm water entrances. Periodical closings of parking spots adjacent to the swells may occur. Lot L is also completed, and will be opened based on need.

Athletic fields renovation:

Aside from the arrival of a replacement irrigation pump, the field renovation project is in its "punch card" phase, which consists of mainly cosmetic and minor work. As of last Friday, ten punch card items remained, and are expected to be completed by the end of April.
