On the other side Job shadow of warehouse work

By Kevin Lage
Features Editor

Working at the warehouse, "isn't a walk in the park," Miguel Mosqueda, assistant supervisor of the warehouse, said.

He thinks he and his fellow warehouse employees should be called supermen because of the great distance they cover. A total of 10 employees work at the warehouse in the college. Five of them are part time students the other five are full time warehouse workers. Those ten people do all of the deliveries at the college including west campus and all of the satellite centers at West Chicago, Carol Stream, Naperville, Addison, and both Westmont areas. They make deliveries to the SRC building, IC building, PE building and the MAC.

The college employs a total of 4,615 people. So the people at warehouse who do all the deliveries at the college make up only .2 percent of the entire college staff.

They go to the morgue, pick up cadavers, bring them to the college and carry them by the body bag to the lab on the third floor of the IC building. Then they take the old cadavers and deliver them to the crematory to be burnt to ashes.

The last big shipment Mosqueda remembers was a

Photo by Aldo Blanco

Student employee Alex Durante unloads one of 25 skids from a trailer as Assistant Warehouse Supervisor Miguel Mosqueda supervises behind him.

bio chamber for the science department. The bio chamber weighed about 1,000 pounds, it's a plant growing chamber. They took it up to the third floor. The bio chamber was able to fit into a freight elevator.

If the item doesn't fit in the elevator, then it has to be carried through the stairwell.

To transport the items the warehouse employees have

vehicles. Regular sized vans for smaller, light weight packages and trucks that are half the size of semi trucks for skids, books, class schedules and anything that should be delivered in a truck of that magnitude.

"We're busy all year round," Mosqueda said. The busiest

Bookstore employee Alex Brock organizes software books. The bookstore sells many types of material for both in and out of the classroom.

Tour of bookstore reveals goods and services offered

By Kevin Lage
Features Editor

After a tour of the Follett Bookstore given by the store director Jim Sexton, who knows the bookstore like the back of his hand, one would later be enlightened to services and goods that one wouldn't normally imagine a bookstore has.

"The book buy back service is the biggest service we offer," Sexton said. Those who bought a book for class can sell that book right back to the bookstore. A book can be sold for up to 50 percent of the original purchase price provided that the book will be needed in a class for next term. The best time to sell is at the end of the semester. The worst time to sell is at the beginning of the semester. This is because the bookstore has already purchased the books they need by the time the semester begins.

The customer service desk will make copies of paper at 10 cents a page. They also have a fax service that costs \$2 for the first page and \$1 for additional pages.

Books can be picked up there if they have been ordered while registering for classes on-line. To do this on

the class registration Web page there is a link that reads: get your books now. This link will allow those to buy the books that are required for the classes they just signed up for.

Most clothing in the bookstore has the College of Du-page logo on it.

"We keep the assortment of clothes fresh," Sexton said. On the racks are clothes for all seasons and clothes for all ages, from adults to youth to babies.

Graduation day is coming soon for many and the bookstore has caps and gowns to wear at the ceremony. To have the right gown size it is best to order before May 10.

Knick-knacks for graduating students are sold there. Things like class rings, graduation cards and key-chains. Greeting cards, wedding day cards, Mother's day cards and all of the basic cards are available.

This is not a cafeteria, but drinks, snacks and other little appetizers are in the check out line.

Typical of a bookstore, notebooks, pens, basic school supplies, planners, calculators and even art supplies are sold here.

Keeping up with technology see 'Bookstore' page 14

Four unsolvable math problems explained

By Kevin Lage
Features Editor

Four math problems that mathematicians throughout history endeavored to solve have finally been resolved on Tuesday by two champions in an event at the college called Mission Impossible.

The champions are students of the college. Their names are Monika Aggarwal and Hannah Yee, they are not presenting at Mission Impossible for a class, but merely for their strong personal interest in math. Three of the math problems they regarded go all the way back to the ancient Egyptians and Greeks.

see 'Math' page 14

Photo by Aldo Blanco

Monika Aggarwal demonstrates how to correctly find the square roots of a spiral construction.

**WESTERN
ILLINOIS
UNIVERSITY**

Get associated. Save on tuition. Guaranteed!

Students who earn their associate's degree and transfer to Western Illinois University immediately upon completing their degree will receive Western's previous year's cost guarantee. Western is the only university in Illinois to guarantee that you will pay the same tuition, fees, and room and board rates for up to four years of continuous enrollment.

Quality and Affordability-
that's the Western guarantee.

HIGHER VALUES IN HIGHER EDUCATION

For Your Information

Failed States lecture and discussion

Ghani & Lockhart address one of the central issues of our times: the proliferation of failed states across the world and our inability to stabilize them. There are between forty and sixty failed states, and they house one billion people.

Two foremost experts on the subject will explain why our solutions have not worked and present a compelling and achievable agenda for addressing this pressing global crisis.

The lecture, discussion and book signing is 7 to 9 p.m. May 5 in SRC 2800.

Two workshops offer career options

Two free workshops, "Women and Technology" and "Men in Health Care," are designed to encourage and promote nontraditional career options for women and men.

Attendees will have an opportunity to visit each of the programs and meet with the faculty, according to Alison Greene, C.O.D. coordinator of Non-Traditional Careers and Tech Prep programs.

Both sessions will be held from 5 to 8 p.m. May 21 for the "Women and Technology" and May 29 for the men in SRC 1544.

R.A.D.S. (Rape Aggression Defense System) Class

The Public Safety Department is once again scheduling a R.A.D.S. (Rape Aggression Defense System) Class

The class is three days long and those who are going should plan to attend all three days to successfully complete the course.

The class focuses on self defense for women. It offers both hands on and classroom instructions.

Anyone under 18 must have written permission from a parent. The class will be limited to the first 15 people that register. There is no cost to attend the class.

Those who are interested in attending, please contact public safety at 630-942-2000 to register for the class.

The class is from 8 a.m. until noon on May 15, 22 and 29 in IC 3112.

The Illinois Special Olympics

The Law Enforcement Officers of Illinois have been raising money for the Illinois Special Olympics for over twenty years. The College of DuPage Public Safety Department is once again participating in this effort by doing its part to help support the Illinois Special Olympics.

All funds raised will go directly to helping the special athletes in their competitive efforts. Last year the law enforcement community in Illinois raised almost two million dollars for this very worthwhile charity.

If you would like to make a donation, e-mail Officer Carl Schnibben of the COD Public Safety Department at schnib@cod.edu.

Also, please provide a phone number if you would like him to call you. If he's not on duty, please see Jennifer from 6:30 p.m to 3:00 p.m. Monday through Friday at the Public Safety Office.

Two workshops break stereotypes

By Kevin Lage
Features Editor

For those who want to eat free pizza read carefully. The pizza will be consumed at two free workshops the college is offering. One is called "Men in Health Care" the other is titled "Women and Technology."

The workshop is desirable to attend not only because of pizza but also for the useful information that will be taught. If one needs more reason than pizza to attend "Men in Health Care," Allison Greene, coordinator of the workshops, has informational brochures available. There are good paying, high demand jobs in the health care industry. Hospitals are begging for nurses, the nursing shortage is predicted to worsen by 2010. Health care careers offer meaningful and fulfilling work.

Motivation to attend "Women and Technology" Greene believes is that technical careers usually have established steps for advancement.

Photo by Aldo Blanco

Anthony Fellis (left) and Syed Sufi (right) demonstrate how to properly administer CPR on a animated dummy. Both Fellis and Syed are students in the nursing program.

Nontraditional careers often offer better pay for women and more job opportunities to choose from.

The purpose of the workshops is, "to promote careers people don't think about and bring more awareness to the public and students," Greene said.

This is the first time the college has offered these workshops. But Greene has experience in workshops like these because she was the co-

ordinator for a mentoring program at the Technology Center of DuPage. Students left their high schools to job shadow. Females job shadowed workers in automotive industry. Males job shadowed workers in the health care industry.

"We support them. Men need to know they aren't alone doing this," Greene said.

The workshops will be divided into four sections each.

"Men in Health Care" is divided into the subcategories of nursing, respiratory care, surgical technology and physical therapist assistant. The instructors at the college that teach those courses will teach each of those divisions. They will answer questions, so it's an opportunity to ask them questions. As a way to break the monotony of taking notes those in the workshops will be allowed to do hands-on activities as an alternative learn-

ing device.

"Women and Technology" contain similar opportunities as "Men in Healthcare" except the agenda is different. Instead the subcategories will be computer internetworking technologies, engineering technology and nanotechnology, heating, ventilation and air conditioning technology, electronics technology and electro-mechanical technology.

As an added bonus guest speakers that are working in the fields will be able to share their experience and add perspective. Current students in the health care, or technology programs will be there to also share their experience and add perspective to those curious ones attending the workshops will be able to appreciate.

The seating for the workshops is limited one must pre-register prior to the beginning of the workshop. "Women and Technology" is 5 to 8 p.m. on May 21 in SRC 1544. "Men in Health Care" is 5 to 8 p.m. on May 29 in SRC 1544. To register call 630-942-2496, or an e-mail greenec@cod.edu.

**GOODBYE,
PAPER.
HELLO,
TREES!**

C.O.D. IS GOING GREEN!
In an effort to cut the costs of paper and postage, College of DuPage will now mail student class schedules and account summary statements only after a student's first registration.

Any changes to your schedule or account summary after the first registration can be viewed on-line at www.cod.edu and click on **Student Online Services**.

'Work' from page 11

part of the year is when they receive computers. Last year warehouse received about 500 computers. They have to tag each computer for inventory, inspect them for obvious outer problems and check that the paperwork matches with the computer.

In the summer warehouse will receive more computers. "Every summer we get furniture and computers," Mosqueda said.

The most popular items for deliveries are paper, and whatever comes in UPS, which can be anything from microscopes to merchandise. Or an air conditioner, maybe a refrigerator if someone in the college ordered one.

If it is a refrigerator, they won't carry it by hand, they will use an electronic pallet jack to lift anything that weighs over 70 pounds. Seventy pounds is the maximum weight that they will lift.

Some days are busier than others. "It's unpredictable how much work you get, but it's usually 150 packages a day," Mosqueda said.

But during the interview with Mosqueda it's predictable that tomorrow is going to be a busy day. Tomorrow the new class schedules for the fall semester are coming. There are so many class schedules that they will have 15 skids in the receiving dock, which will fill up most of the floor.

Despite the hard work they do at work Mosqueda said that he is happy he's working here. He has had other jobs working at a warehouse where the atmosphere feels like they're breathing down your neck. But at the college warehouse Mosqueda is glad that he gets to do other jobs.

"As an assistant I don't just sit behind a desk I get to help my other co-workers help them be on top," Mosqueda said.

'Math' from page 11

The first problem is trisecting an angle—cutting an angle in three pieces using only a compass and straight edge. Many ancient Greeks thought that is possible to trisect an angle. Then after much time has elapsed in the early 1800's it was proven that it is impossible to trisect an angle. The Greeks go back to 300 B.C. so after 2,100 years of the problem hanging in limbo of being solvable or unsolvable someone has finally found the answer.

"It's not that people are stupid," Jim Bradley, mathematics professor and mentor at Mission Impossible, said. "But that math has been evolving."

The second problem is called doubling a cube—construct a cube with twice the volume as the first cube using only a compass and straight edge. Like it was a walk in the park the champions easily proved that it is impossible to do.

Photo by Aldo Blanco

Hannah Yee shows how to make a perpendicular line.

Third problem is squaring a circle—construct a square that has the same area as the circle given using only compass and straight edge. This problem has been around since 1,600 B.C. Not until 1,900 A.D. has the answer been uncovered. It took 3,500 years for mathematicians to solve the problem that it is unsolvable.

Finally the last problem is a newer one called the seven bridges problem—cross each bridge exactly one time. This problem has been around since the 1,700s and was proved quickly that it is im-

possible to cross the seven bridges exactly once each. The trick to solving the problem is, "don't worry about the bridges, worry about the math involved," Bradley said. The significance of the bridge problem is that it led to the development of two math related disciplines, topology and graph theory.

The champions also showed in their presentation that one can cut an angle in two, or bisect it—sometimes one can even trisect an angle. Also one can construct with compass and straight edge a square that has been doubled in area, but one cannot double the volume of a cube.

This event wouldn't have been possible without Natural and Applied Science Dean Adenuga Atewologun. "He has been very much a leader, and aggressive in trying to improve academics at COD making it better and better," Bradley said. For five years Atewologun has been running lectures like this one.

Typically he does one lecture every one month. This is the first time students presented at a lecture, "it's a way of extending the appeal of the subject matter beyond the classroom," Atewologun said.

In years past Atewologun has brought experts in chaos theory for a lecture, a fractals lecture, moon rock from Apollo lecture, there has even been a lecture on bass fishing it was about ecology.

'Bookstore' from page 11

ogy, the bookstore has lots of electronics. The store is authorized to sell Apple products such as iPods, MAC computers, MAC software and iPod accessories that are sold at substantially discounted prices.

"It's a great advantage for students," Sexton said. Other technological devices they

stock are satellite radios, voice recorders, T-mobile and Virgin mobile cell phones.

Near the computer section Xbox, PS3, and Wii games are sold. The games have been released recently, they're newer titles. For further entertainment one can also buy new music CD releases and DVD movie new releases.

To balance out the video games students or employees can buy books. Books for all

the classes at the college are available. Bargain books and New York Times best sellers at 30 percent off make for a cheap, vocabulary expanding read.

"The bar chart cliff note laminated one page study guide is very popular," Sexton said. He is referring to quick reference guides that contain the basic subject material for particular classes.

Students can use two avail-

able computers at the bookstore for anything necessary. The computers are most helpful when a student forgets their class schedule and doesn't know what books to get.

Follett's has released a "green section," filled with candles, recycled material scarves, shirts and other accessories. Some proceeds from select products benefit the makers in underprivileged countries.

How to create your new club

1. There are three requirements in order to charter a new club.
 - A. You must have at least three interested students who are taking at least one credit course and are willing to act as officers for the club.
 - B. You must have at least one full-time faculty or staff member who is willing to serve as adviser for the club.
 - C. You must have a club constitution.
2. It is the students' responsibility to find an adviser for the club.
3. Students interested in forming a new club should fill out the New Club Inquiry form.
4. The student will receive a reply with possible meeting times. A copy of the sample constitution (MS Word) file will be attached so the student may begin work on their document.
5. The interested students and potential advisor(s) will meet with the Coordinator of Student Activities who has been assigned as the group's Student Activities liaison. The purpose of the meeting is to discuss what is required to start a new club, and officer and adviser responsibilities. The club constitution will be submitted at that time to be reviewed by the liaison and Director of Student Activities. Required paperwork includes:
 - a. Final copy of constitution
 - b. Officer Update form
 - c. Adviser Update form
 - d. Club Information form
 - e. Information concerning outside or parent organization (if required)
6. Following the chartering meeting, all paperwork will be sent to the Director of Student Activities and the Vice President of Student Affairs for approval. Once approved, advisors will receive a memo and clubs can begin to utilize club benefits.

General Information for New Clubs

- New clubs are chartered with future students in mind, not just current students.
- Student clubs are student run. That means club members are the decision-makers of the group.
- Once a club is approved, Student Activities will copy up to 75 flyers for the club to promote their first meeting. After that the club must raise funds to cover all its expenses.
- It is the club members' responsibility to keep the club going. That means you should always be recruiting new members.
- All club members are encouraged to participate in the Leadership Connection Series sponsored by Student Activities.

Events form

The Courier wants to cover your events

If your club has an event coming up, fill out the form to the right and bring it to SRC 1560 and drop it off with the features editor.

You can also contact the features editor at features@cod.edu or at (630) 942-2660.

The Courier has covered many

events in the past, from bake sales to book discussions, so any event is perfectly valid.

Please turn in your form at least a week in advance so that coverage of your event can be scheduled and your article prepared.
