

# COMPUTER INFORMATION SYSTEMS 1160

## Windows Command Line (DOS)

This is an information sheet only, not the course syllabus.

### COURSE DESCRIPTION

Introduction to microcomputer operating systems. Provides an opportunity to work with the Microsoft Windows operating system command line. Includes the major components of an operating system, command syntax, disk format and management, internal/external commands, file manipulation, directory structure, files and disk maintenance, configuration and batch files, and network connectivity. (2 credit hours)

This course teaches the command line in a Windows XP environment. If you are working in a Windows 2000 or Vista environment, you may be able to complete the course, but the screen shots in the textbook will not always match your screen. The text has not yet been updated to the command line in Vista, so if any of the commands do not work, you may need access to a computer with Windows XP. Under no circumstances should you try to complete this course using Windows 95 or Windows 98.
