

COMPUTER INFORMATION SYSTEMS 1310

HTML and CSS

This is an information sheet only, not the course syllabus.

COURSE DESCRIPTION

Creation of effective web pages using Hyper Text Markup Language (HTML) and Cascading Style Sheets (CSS). Includes web page and web site design concepts and preparation of graphics for the web, with the primary focus on implementation of the design. Prerequisite: CIS 1150 or CIS 1110. (3 credit hours)

COURSE MATERIALS

Required Textbook:

New Perspectives on HTML and XHTML, 5th Edition, Comprehensive, Patrick Carey; Course Technology, 2009

ISBN: 978-1-4239-2546-0

Text Editor: If you don't have a favorite text editor, suggested program is **Notebook++** which is a freeware program used by instructor. Contact the instructor for further information.

Software Requirements:

Web Browser - Assignments may be graded using the latest version of either Internet Explorer or Firefox.

Recommended Reading:

Designing Web Usability by Nielsen

Prioritizing Web Usability by Nielsen and Loranger

Designing the Moment by Hoekman

COURSE ACTIVITIES/EVALUATION

Activities include software labs, quizzes/tests, reports, projects and a final project. A point value is given for each and is subject to change per the instructor. Activities are designed to reinforce concepts covered, illustrate your knowledge of the material, and demonstrate your ability to apply concepts learned in class.

GRADING

Final Grade	Points Earned
A	900-1000
B	830-899
C	760-829
D	690-759
F	Below 690

SATISFACTORY/FAIL (S/F) GRADE OPTION

The S/F grade option is available to students in this course. Contact instructor or refer to syllabus for details and conditions.

INCOMPLETE POLICY

The Incomplete grade option is not available for this course.
