COURSE OUTLINE

The goal of this course is to prepare students for the successful completion of the Respiratory Care Board Examinations and to provide CEU's for the licensed respiratory therapist. The text for this course is designed to prepare you for both the CRT and RRT examinations. There are from a few paragraphs to a few pages that contain advanced material in each chapter. Quizzes on-line are CRT and RRT level. This text has been selected so that you do not have to buy two texts for the course. Occasionally you will be referred to other sources to supplement the entry level material.

This course should give participants an organized method and study schedule for the review of material covered on the entry level credentialing examination for respiratory care. The students will also be given the opportunity to practice taking computerized examinations.

EVALUATION/GRADING

The final grade will be based on the following:

1. Chapters 1, 2, 4 on-line test (Unit 2)
