

## The Professional Pharmacy Technician Program

The Professional Pharmacy Technician program is a 60 hour course designed to teach students the fundamentals and particulars of being a pharmacy technician. The program is geared towards a variety of students, including those interested in becoming pharmacy technicians, pre-pharmacy students, or those with a health care background looking to strengthen their current skills. This class introduces students to various pharmacy practice settings and covers drug classes, basic physiology, drug interactions and daily pharmacy operations. This program trains individuals to effectively assist in pharmaceutical preparations and complete daily required tasks in any pharmacy environment, although on-the-job training is still a crucial part of the educational process

All classes are taught by an interim licensed or practicing Registered Pharmacist or Doctor of Pharmacy who brings real-life experiences to the classroom. A certificate is granted upon successful completion and job placement assistance is available.

## MRxi Corporation: Course Information

- The class typically meets two nights per week or all day Saturday for a total of six hours and continues for 10 weeks.
