

## **Determining Usefulness**

3. When was the source published and how does this affect its usefulness for your purpose?

4. What type of audience is the author addressing, specialized or general? How does this impact your use of the source?

5. How extensively does the source cover the topic? Is the information appropriate for your project? Is it either too simple or too complex? Too broad or too specific?

6. Based on the information gathered in this worksheet, will you end up using the source you have evaluated? If so, why? If not, describe a project for which your information source would be more appropriate.
