

## **Library Instruction Session Observation**

Write a one-page paper reflecting on what you observed during your visit to a library instruction session.

Write about whatever comes up for you in the session that seems interesting and valuable for yourself or your students. Please do not evaluate the librarian teaching the session.

If you need more help, consider these questions:

- What are some of the materials, concepts or topics covered that you were unfamiliar with? Did you learn something new that you found personally useful?
- Were there materials, concepts, or topics covered that you are now interested in including in your own research assignments and library instruction sessions?
