	Description Product description The Topcon RL-H5A Horizontal Self-Leveling Rotary Laser is a multi-purpose laser that is ideal for grading, excavating, site preparation, concrete works, and other general construction projects. With a laser receiver, it offers a long operating range that covers up to 2,600 feet in diameter. This laser level also offers an accuracy of up to $\pm 1/16"$ or $1/8"$ at 100 feet and is self-leveling within ± 5 degrees. For added precision and accuracy, the RL-H5A features a manual single-axis leveling method, which allows you to match existing single slopes, and rotates 600 times per minute while the self-leveling of the cross-axis provides out of level protection for the opposite axis. The RL-H5A transmitter sends a continuous self-leveled 360-degree laser reference over your entire work area, allowing you to work longer from each setup with greater accuracy. This horizontal rotating laser is simple to use, intuitive and re-levels itself immediately if the device is disturbed on the job. Just turn it on and in seconds you're working. With an IP66 rating, the Topcon RL-H5 series is protected from dust and low-pressure water jets. RL-H5A laser levels are covered by Topcon's 5 year guarantee against defects in parts and/or workmanship for a period of 5 years. This rotary laser uses either a dry cell or a rechargeable battery that can power the device up to 100 hours, making it the great companion for a long day at work. Weighing only 5.07 pounds, this laser level measures 6.77" L x 8.31" W x 8.07" H. Laser Class-II; Laser Type-635nm, <1mW
